Minutes of the March 23, 2014 Meeting

Meeting commenced at 11:30 AM.

In attendance were: Cormac *Crescent*, Paul *Dolphin*, Brianna *Silver Trumpet*, Manus *Wintermist*, Jeanne Marie *Noir Licorne*, Angharat *Coral*, Selene *Aurum*, Estrith Rasmussdatter, Elizabeth of Roxbury Mill, Avicia *Exchequer*, Aliskye *Scribe Armarius*, Thomas *Quatrefoil*, Selewynn Beltran, Damien *Sable Fret*, Illuminada *Chanson*, Fergus MacDuff, Richenda du Coffin, Hrorek *Chevron*, Lachlan *Duellist*, and Mealla Caimbeul.

Meeting schedule for 2014: April 20, May 11, June 22, July 20, August 10, September 14, October 19, November 16, and December 7 (Holiday Party)

Approved submissions were forwarded to Laurel on the March 31st, 2014 Letter of Intent.

From Crescent:

- KWHSS sign up! We need classes -- talk to Jeanne Marie! Registration for hotel May 15th. Articles for proceeding – send to Paul; merchants – Angharat and Gwen Hir
- OP to go live at the end of this month; please check for missing awards.

From Dolphin:

- From the December 2013 LoAR:
 - Juliana *Pelican Emerita* provided a website with names of 14th & 15th century English soldiers (<http://www.medievalsoldier.com>) as well as several resources for period German names.
 - *Wreath* had a lot to say about dolphins – thanks to a Caidan submission. In reference to the submission of Daniel Fisserman of Muddy Waters, *Wreath* overturned earlier precedent stating that we did not grant difference between dolphins facing to dexter or sinister when their bodies were in a vertical orientation (hauriant or urinant). We will grant this difference; further, dolphins must be drawn in such a way that the orientation of the head is clear. Finally the Glossary of Terms will be updated to reflect that the default posture for dolphins is embowed-counterembowed.
 - *Wreath* also made two requests for input about how we ought to handle a pair of issues raised by recent submissions. First, how should our rules for complexity counts interact with unblazoned details or those that do not count for difference? Second, should we change the way we handle gores, gussets, and tierces to be more consistent with the way we believe they were used in period?
- From the January 2014 LoAR
 - Juliana *Pelican Emeritus* provided several criteria to keep in mind when judging name resources.
 - *Pelican* ruled that B batches in FamilySearch Historical Records are acceptable as documentation, along with C, J, K M (except M17 and M18) and P batches.

- *Wreath* overturned the precedent ruling the “phases of the moon” motif to be a Step From Period Practice. “We know that the motif of *an X between two Ys* is a fairly common one in later period English armory. Non Scripta found evidence of *a rose between two lions combattant* and *a mullet between two lions combattant*, and Elmet added *a fleur-de-lys between two rabbits passant respectant*, all in English armory. Orle actually found *a roundel between a decrescent and an increscent* in Italian armory. We have never considered *an X between two Ys respectant* to be considered a step from period practice with any other combination of charges, only with a roundel and crescents, which is not consistent. Therefore, we are overturning past precedent. This motif is no longer considered a step from period practice.”
- *Wreath* also provided further clarification on how the rules for unity of posture and orientation. “An arrangement of charges within a group that is blazonable is registerable, as long as it does not otherwise violate the unity of posture and orientation rule by having different postures/orientations amongst the group. In short, when you have comparable postures/orientations amongst the charges in a group, they should be in the same posture/orientation. For example, *three swords in pall and an arrow fesswise* has comparable charges in different orientations and would therefore be a violation of A3D2c, but *four mullets in chevron and a rose* would not. The latter may be poor style, but at this point we are not inclined to further restrict charge group arrangement upon the field.”
- A request was made by *Coral* to look into having remote participants attend future meetings via Skype. *Aurum* volunteered to set up the pilot program for April.

March Submissions

Adam Makandro - New Name & New Device. *Per pale vert and sable semy of oak leaves argent.*

Submitter desires a masculine name and allows minor changes only. If the name must be changed he cares most about the language/culture 12th-14th C. Scottish. He has removed the authenticity request. The submitter changed the spelling on the form prior to submission.

Adam is a header spelling in Withycombe, p. 3, dated 1086-1306 et al.

Makandro is found in Black, s.n. MacAndrew, dated in this spelling to 1502 & 1550.

The device conflicts with Catherine of Shirwode, *Per pale argent and azure semy of oak leaves argent.* Catherine has granted a blanket permission to conflict with a single DC, which this has for changes to the field.

Name approved and forwarded to Laurel. Device approved and forwarded to Laurel.

Æduin of Skye - New Badge. (*Fieldless*) *An alphyn rampant argent.*

We note that precedent (Angelo di Antonio Machiavelli, April 2010, Middle-A) states "The alphyn and the tyger are both named period monsters. No basis for the phrase 'lack of clear heraldic difference in period' was found. Since the two types of charge are distinguished between in period, we will grant a CD between them unless examples are found that they are considered equivalent in period."

Badge approved and forwarded to Laurel.

Æsa Sigurdsdottir – New Name & New Device. *Argent goutty de poix, a dragon couchant purpure.*

Submitted as *AEsa* we have changed the spelling to the *Æsa* to match standard practice. The submitter desires feminine name and has marked no other boxes.

Æsa is documented on the Viking Answer Lady's website

(<http://vikinganswerlady.com/ONWomensNames.shtml>) as being found in *Landnámabok* and in *Geir Bassi* on p.17 (figure 1)

Æsa	May perhaps be identical to Old Icelandic <i>æsa</i> , "to stir up, incite, stir up war". This name appears in <i>Landnámabók</i> in ch. 40 for <i>Æsa</i> of <i>Svíney</i> , the mother of <i>Eyjólfr</i> ; <i>Æsa</i> <i>Oddleifsdóttir</i> in ch. 46; <i>Æsa</i> , the daughter of <i>Ljótólfr goða</i> in ch. 65; <i>Æsa</i> , daughter of <i>Hrólfur rauðskeggr</i> ("red-beard") in ch. 72; and for <i>Æsa</i> , daughter of <i>Jarl Hákon Grjótgarðsson</i> in ch. 99. In commenting on the submission for *Armegardj Sigurdsdottir*

(<https://oscar.sca.org/index.php?action=145&id=18905>), *Gunnvor silfraharr* noted:

The normalized Old Norse genitive form of the masculine name <Sigurðr> is <Sigurðar>, but by the 14th century spellings of the genitive case form in <Sigurds> and <Sigurdz> appear. The examples from *Lind* and *Diplomatarium Norvegicum (DN)* are from Norway, while *SMP*, *Diplomatarium Suecanum (DS)* and *Diplomatarium Dalecarlicum (DD)* are from Sweden.

Name approved as changed and forwarded to Laurel. Device approved and forwarded to Laurel.

Agrippa Morris - Kingdom Resub Device. *Per pale gules and sable, a castle argent and a bordure argent semy of caltrops sable.*

His prior submission *Per pale gules and sable, a castle argent and a bordure argent* was returned Feb. 2014 by Dolphin for conflict with Manfred Odo von Falkenmond, *Gules, perched atop a tower a hooded falcon, within a bordure argent.* The falcon is a maintained charge, thus there was a single DC for changes to the field. The addition of the caltrops provides the second DC.

Device approved and forwarded to Laurel.

Aífe ingen uí Chanainn - Laurel Resub Device. *Argent, on a butterfly vert a pawprint argent.*

Submitter's previous device of *Vert, a wolf's head cabossed and a gore argent* was returned on the December 2013 LoAR for lack of identifiability; this is a complete redesign.

There is a SFPP for the pawprint.

Device approved and forwarded to Laurel.

Alexander Hostilius of Caid - New Device Change. *Sable, a hippopotamus statant between four crescents in saltire horns outward within a bordure Or.*

His previous device, *Sable, a hippopotamus statant within a bordure Or*, is to be released. We note that the crescents are more clearly in saltire on the rectangular shield he regularly uses.

Device approved and forwarded to Laurel.

Álfdís Svölnudóttir - New Name.

The submitter desires a feminine name and will allow all changes. If the name must be changed she cares most about Old Norse language. She request authenticity for Norse/Viking.

Álfdís is found as a feminine given name in Geirr Bassi on page 8.

Svala is found as a feminine given name in Geirr Bassi on page 15. The matronymic **Svölnudóttir** is formed based on the example of Halla on page 18 of Geirr Bassi.

Name approved and forwarded to Laurel.

Alice Upton - New Name & New Device. *Per pale purple and sable, an eagle rising maintaining a sheaf of arrows argent.*

The submitter allows all changes and has not marked any boxes.

Alice is found in R&W (s.n. Bubwith) with Alice Bubwith alias Pekeman dated to 1463.

Upton is found in Mills, s.n. Upton where it is noted as "a common name, usually 'higher farmstead or village'". The dated spellings include Upton 1463.

We believe the device to be clear of Rorik Fredericsson, *Azure, a grey goose volant bendwise wings addorsed proper gorged of a coronet Or* (Dec. 1999, Atlantia), with a DC for changes to the field and at least a DC for the changing the type of bird.

There a possible conflict with Germaine Silverbird of Staghurst (Dec. 1995, Middle), *Per bend sable and vert, a lark rising wings elevated and addorsed argent carrying in its talons a tankard fesswise distilling a goutte Or*. There is a DC for changes to the field. There may be a DC for the type of bird.

This definitely conflicts with Llewellan Gwynn (June 1987, Atenveldt), *Per fess indented of two points sable and argent, in chief an eagle rising argent*. There is a DC for changes to the field however there is no difference for the placement of the eagle as Llewellan's eagle is forced to be in chief.

Name approved and forwarded to Laurel. Device returned for conflict.

Anne la Petite - New Name & New Device. *Sable, two rapiers in saltire between in cross three bees and a beehive, a chief Or*.

la Petite is found in Sara L. Uckelman, "DRAFT: Names in the 1292 census of Paris" (May 12, 2013 version, <http://www.ellipsis.cx/~liana/names/french/1292paris.pdf>). It is found on p. 150 as a descriptive byname meaning "the little".

Atharic Thaurismunths sunus - Laurel Resub Device. *Per chevron azure and sable, in base three wolves courant contourny in annulo argent*.

His previous submission, *Per chevron azure and sable, in base three two-headed wolves courant contourny in annulo argent*, was returned on the October 2011 LOAR: "This device is returned for a redraw, for violating section VII.7.a of the Rules for Submissions which requires that "Elements must be recognizable solely from their appearance." The wolves here were not identifiable to a majority of commenters as having two heads. Drawing all four legs more distinctly would also help identifiability." This design addresses the issues for return.

Device approved and forwarded to Laurel.

Audfleda Eberhart - New Name.

Submitter desires a feminine name and will allow minor but not major changes. If the name must be changed she cares most about the meaning (Audefleda - Regal Beauty, Eberhart - strong as a boar) and an unspecified language/culture.

Audefleda is documented from <http://faculty.ycp.edu/~tgibson/gibson/Ancestry/indiP2420770795.html>, where she is identified as the daughter of the king of the Franks (Audefleda MEROVING 456 – 526). This may be a unique name.

Eberhart is documented from <http://houseofnames.com/eberhart-family-crest>. This is not a suitable source. We were unable to locate documentation for Eberhart which would be compatible with a 5th C given name.

Name returned for lack of documentation.

Device approved and forwarded to Laurel.

Dyrfinna Drengsdottir - New Device. *Per chevron vert and purpure, two trees couped and a wolf rampant contourny argent*.

The per chevron line of division does not meet the current standards for a field division as the field is not equally divided as into two parts. The trees should also be drawn somewhat larger.

Device returned for redraw.

Estrith Rasmusdatter - New Badge. *Gules, a staircase bendwise sinister Or.*

This is the defining instance in SCA heraldry of a staircase. Staircases are found in the canting arms of Gradenigi, c.1550. <http://daten.digital-sammlungen.de/~db/bsb00001419/images/index.html?id=00001419&fip=193.174.98.30&no=&seite=361> (figure one) and in the arms of Pietro Gradenigo, Doge of Venice 1289-1311 (figure two).

SEN A Appendix C allows Middle Irish Gaelic and Welsh to be combined if they are documented within 300 years of each other. We were unable to find documentation to meet the submitter's authenticity request.

The submitter's device possibly conflicts with Cormac Ainsheascar mac Muiredaig, *Per pale argent and sable, a bat counterchanged* (Apr. 2010, Æthelmearc). There is a DC for changes to the field, there may also be a DC for changing the tincture of the rermouse.

Permission to conflict has been granted by Lizbeth Ravensholm. Copies of the original submission forms were not received by Dolphin in time to include this on the March LoI, so it will be included in April.

Wintermist is an SCA branch name registered September 1988.

It was unclear how to proceed on this submission, as in theory the submitter already has this name and does not need to do anything.
