Le Mercure françois: ou, la suite de l'histoire de la paix, Volume 14 by Jean Richer 1627

Title translation *The Mercure françois: or, the suite of the history of peace*

Translation of documentation led by Captains Treille, Odoiart, Masson and Martin. After that,

There was much discussion over the size of the bird in relation to the roses and their respective visual weight. Some felt the bird was too large to classify as “co-primary” with the roses and thus grounds for return.

The submitter does not accept major or minor changes, but will allow the given name to be registered as Gabrielo (with one L) if necessary.

Gabriello (with two L's) is cited as a masculine Italian given name from the court records of Viterbo, 1571 (Sara Uckelman, "Italian Masculine Given Names from 15th and 16th Century Viterbo", www.ellipsis.cx/~liana/names/italian/viterbo.html).

9: Paul Spearbreaker – Laurel Resub Device *Quarterly sable and gules, a helm affronty and in chief a spear fracted in chevron, point to sinister Or*

Original submission was returned on the November 2014 LOAR:

This device is returned for violating SENA A3D2c, Unity of Posture and Orientation, which states "A charge group in which postures for different charges must be blazoned individually will not be allowed without period examples of that combination of postures." The charges here are not in a unified arrangement, as the fracted spears must be blazoned independently with one "in chevron" and the other "in chevron inverted". Having both "in chevron" or both "in chevron inverted" would solve that issue.

This redesign addresses the reason for return. The college has notified the submitter that the eye holes should be gold.

Device approved and forwarded to Laurel.
