From Dolphin: Thank you to everyone who volunteered at Herald's Point at GWW! We really appreciated the help and look forward to seeing you all again next year!

**From Gold Starre for GWW:** Huge thank you to Cormac Beare who did heraldic art for all of the consultation hours. Also many thanks to Ren Shu for being the PayPal angel, Alienor Dolphin, Mary Pilgrim, Solomon Karamzin, Richard James MacCausland also for their assistance. I hope I did not miss anyone but thank to everyone it was a very successful Consulting Heraldry weekend.

### October Submissions

**Adelais de Tours - New Name & New Device.** *Per bend sinister wavy azure and purpure, an estoille and an artichoke Or*

**Adelais** is found as a feminine French given name found in *Feminine Names from the Cartularium of the Monastery of Blessed Mary by Aryanhwy merch Catmael dated to 1104*  
<https://www.ellipsis.cx/~liana/names/french/beatamaria.html>

**de Tours** is found as a French surname dated to 1292 in *An Index to the Given Names in the 1292 Census of Paris by Lord Colm Dubh* in the name "Lorrenz de Tours, haubergier".  
<https://heraldry.sca.org/names/paris.html>

The question was raised in commentary whether or not this name presumes upon *Adelaide de de Tours*, the matriarch of the Capetian line of French kings. As this decision can only be made at the Laurel level, ask for a ruling from Pelican.

**Anton** is an English masculine given name dated to 1556 found in familysearch records

Anton Gybson Male Marriage 5 Jul 1556 Saint Oswald, Durham, Durham, England M00009-1

Caradoc is the name of a saint. See, e.g.,  
[https://www.catholic.org/saints/saint.php?saint\\_id=2595](https://www.catholic.org/saints/saint.php?saint_id=2595),  
[http://en.wikipedia.org/wiki/Saint\\_Caradoc](http://en.wikipedia.org/wiki/Saint_Caradoc) The use of a saint's name removes the temporal disparity if any exists.

Unmarked patronymics are allowed in both English and Welsh per SENA App A

Per Commentary from JM: Caradoc was a Welsh saint; he died in 1124.

The name was known in late period. Images 1 and 2 are from a 1584 book, *The historie of Cambria* [by st. Caradoc] tr. by H. Lhoyd, corrected, augmented, and continued, by D.Powel (<https://books.google.com/books?id=-gEIAAAQAQAJ>).

Images 3 is from a 1615 play, "The Valiant Welshman or The True Chronicle Istgory of the life and valiant deedes of Caradoc the Great, King of Cambria no called Wales" publish as Old English Drama: Students' Facsimile Edition, Volume 160< (<https://books.google.com/books?id=F0g6AQAAMAAJ>).

**Ashe Krull - New Device**

*Per chevron purpure and azure, in fess a raven and an owl respectant argent maintaining between them a wheel Or.*

This is not considered slot machine as the wheel is part of a secondary charge group and not a third primary charge.

This does not run afoul SENA A3D1B Because there is a DC between owl and a raven. Wreath has ruled "As there is at least a DC between ravens and owls, they may appear on the same armory together." [Katla of Viborg, 04/2020, A-East] It is probably worth citing that precedent when this is forwarded.

I don't think the head posture affects Unity of Orientation. Both birds are close and respectant is a standard group arrangement.

**Device approved and forwarded.**

**Astrid Harecroft - New Badge.** *(Fieldless) A schnecke within and conjoined to an annulet sable.*

Per JM: I was unable to recognize the primary charge even after reading the blazon. Since the schnecke can't issue from the edge of the field it needs to be blazoned as couped.

There is a step from core practice for using a schnecke with a secondary charge (SENA Appendix G2).

This design is returned for being visually indistinguishable from the badge of Mjoll Úlfarsdóttir *Argent, a gorges within a bordure sable* (Calontir-A, November 2017).

Submitted by Alienor and Mary

Per JM: Tangwystl's article doesn't actually have verch. What it says is "In this document, Latin filia is the only word found for this, although Welsh verch can be found in documents of a similar period." That should be sufficient to register it in this name.

Constanza's article is not an AH Appendix H source. Don't forget to include a copy when this is forwarded. The article has Rhydderch as a header form. The name found in the acts is Retherech, which is dated to 1190.

Per Paul: Rhydderch is found as a Welsh unmarked patronymic in Cadwaladeri Rhydderch, in the entry for Elizabetha Cadwalader, Christening Date 25 May 1633, Place Kerry, Montgomeryshire, Wales, Batch C04949-1. <https://www.familysearch.org/ark:/61903/1:1:V5FH-WD4>

Tangwystl's "A Simple Guide to Constructing 16th Century Welsh Names (in English Contexts)" (<https://heraldry.sca.org/names/welsh16.html>) identifies Rhydderch as the standardized form of a Welsh given name that appears in other spellings in her sources. This supports the Lol's assumption that Rhydderch in the FamilySearch entry was an unmarked patronymic.

Device: Please double check conflict check was done on lozenge as well as vetu ploye.

**Hrafna** is a nickname found in GB pg 23 meaning raven.

Per Paul: I don't see why this name implies a relationship with Hakon Hrafnsson. The son of Haakon Hrafn would be [given name] Haakonsson. Hakon Hrafnsson would be the son of someone with the given name Hrafn. Dolphin concurs with Mash Rake's analysis.

Per Paul : Ravenstown is an English town in Cumbria found in Ekwall, but it appears to be a post-period settlement.

There are two English towns modernly called Ravenstone, one in Buckinghamshire and the other in Derbyshire. Ekwall gives the same etymology for both: "Hrafn's farm/village/estate." Dated spelling of these two towns include Ravenstvn (dated to 1086) and Rauenston (dated to 1262). Given that, Ravenstown seems a plausible late-period spelling.
